

**Authorisation for Temporary Importation of goods
from the Channel Islands for Repair, Calibration or Loan**

The Channel Islands are outside of the EU so **All** goods being imported into the UK are subject to import VAT and Duty. However for consignments that are being sent to the UK to be repaired and returned to the owner in the Channel Islands afterwards, we can apply to HM Revenue & Customs (HMRC) to allow their importing under the IPR scheme for VAT suspension (Simplified IPR formerly known as C101).

To do this we will need this form to be filled out by the consignee (receiver) and they must also understand that they will need to declare to HMRC (at the point of export) when the goods are exported out of the UK and back to the Channel Islands, via the HM Revenue & Customs New Export System (NES). Failure to do this could result in HMRC claiming any unpaid VAT/Duty for the goods if satisfactory proof cannot be provided that the goods have left the UK and returned to the Channel Islands.

To: HM Revenue & Customs

We hereby authorise G4S Security Systems and its agents to import our consignment under Simplified Inward Processing Relief.

Regency Consignment Number (to be completed by Regency)

For a consignment from

Nature of the work to be done

Length of temp. import Value

Company Name and Address

Post Code

Our VAT Number is Tel

Signature

Printed Name Date

Instructions

This form is to be completed by your customer/consignee who is returning goods for repair or modifications to you.

The consignee (receiver) must complete all fields and print the document 4 times. Please use Company headed paper where applicable. Customs prefer all invoices to be typed. Complying with their regulations helps alleviate possible delays.

Once the Authorisation for Temporary Importation of goods from the Channel Islands for Repair form (above) is printed please attach the 4 copies to the outside of the package being returned.

Please make sure you package the goods the same way you received them.
